1. SUMMARY

Widseth has completed a Phase I Environmental Site Assessment (ESA) of Simplot Property Parcel No. 83.02308.00, located along 10th Street Northeast, East Grand Forks, Minnesota (subject property). This environmental site assessment was conducted to reveal evidence of recognized environmental conditions (RECs) identifying potential releases in connection with the subject property, in accordance with the American Society of Testing and Materials Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (Designation: E1527-21). Any exceptions or limitations to, or deletions from this practice are described in Section 2.4 of this report.

Site reconnaissance, interviews, and historical research were completed during this Phase I ESA. Where available, aerial photographs, fire insurance maps, and historic and topographic maps were reviewed as part of the historical research.

The subject property consists of parcel No. 83.02308.00 encompassing approximately 10.55 acres. The subject property, partially developed prior to 1939, included several structures and a railroad spur. However, the nature of the property usage was not determined during this assessment. Additional development included the addition of several other structures throughout the property. The subject property is owned by Simplot Potato Proc Inc. (Simplot) and is currently undeveloped. Historical research and interviews indicated the subject property was used by Simplot for potato and equipment storage since the early 1980s until their new facility was built sometime prior to 2011.

The surrounding properties are characterized by various commercial developments as well as several residences to the south.

During the site reconnaissance, the subject property appeared to be in good condition with no observed evidence of spills/releases of petroleum products or hazardous materials.

Interviews with people knowledgeable with the subject property did not reveal any items of environmental concern.

A records search indicated that the subject property was not included on any of the searched environmental databases. However, two immediately adjacent sites were identified in the database search. The first is the former Holiday Station Store #3547 (now Circle K). This site is listed on the UST, HIST SPL, and a SPILLS databases. The SPILLS and HIST SPL designations are associated with a wash water issue related to the car wash. Although this site is a UST site, it has not had any reported leaks. This site is therefore not considered a REC and is not a risk to the subject property. The second site is the Ryan Potato wash plant located to the east of the Simplot property. This site was identified as a HIST LAST site (LS0018121). The leaksite was investigated under the direction of the Minnesota Pollution Control Agency (MPCA). The leaksite was closed in 2013 because it was determined that any remaining contamination is not a risk to the leaksite or

adjacent properties. This site is considered a controlled recognized environmental condition (CREC) and is not a risk to the subject property.

This assessment has not revealed the presence of any RECs in association with the subject property.

2. INTRODUCTION

2.1 Purpose

Widseth was retained to perform a Phase I ESA of Simplot Property Parcel No. 83.02308.00 located along 10th Street NE in East Grand Forks, Minnesota. The location of the subject property is shown on Figure 1. The purpose of this Phase I ESA is to identify, to the extent feasible pursuant to the process prescribed in American Society of Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (Designation: E1527-21), RECs in connection with the subject property. The term REC means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property (1) due to a release to the environment, (2) under conditions indicative of a release or likely release to the environment, or (3) under conditions that pose a material threat of a future release to the environment.

2.2 Detailed Scope of Services

1) Review available public records/documents helping to identify RECs in connection with the subject property, including an environmental database report. The database report includes a current search of state and federal agency databases listing known evidence of contamination at or near the subject property.
2) Conduct a site reconnaissance to collect data and observe any environmental conditions related to the subject property and any structures located on the premises, to the extent not obstructed by adjacent buildings, bodies of water, bituminous or other paved surfaces or by limiting conditions such as snow or rain.
3) Interview past and present property owners, occupants, or operators to review property boundaries and obtain information relevant to the subject property or adjoining land. When necessary, interview knowledgeable local government officials.
4) Prepare a report containing observations relating to the apparent environmental condition of the subject property, describing areas of impact, summary of records/documents reviewed, analysis of collected data and the consultant's conclusions.

2.3 Significant Assumptions

1) Offsite contamination has been documented and discovered through historical use information;
2) Site owner, occupant and/or manager have been forthcoming in revealing knowledge of environmental incidents; and
3) Historical use information is correct.

2.4 Limitations and Exceptions

The conclusions and recommendations in this report represent our opinions, which are based on the information gathered during the assessment. These opinions were arrived at in accordance with currently accepted engineering, hydrologic, and geologic practices and are subject to the inherent limitations of environmental site assessments. No environmental site assessment can eliminate uncertainty regarding the potential for RECs in connection with the subject property. Within reasonable limits of time and cost, an assessment conducted according to ASTM standards is intended to reduce uncertainty regarding the potential for contamination of the site.

There were no limitations or exceptions to the practices set forth in ASTM Designation: E1527-21 for this ESA.

2.5 Special Terms and Conditions

No special terms or conditions were included.

2.6 User Reliance

This Phase I ESA was prepared specifically for the City of East Grand Forks. No other party may rely on its contents without permission from Widseth.

3. SITE DESCRIPTION

3.1. Location and Legal Description

The subject property is located in northeast East Grand Forks, MN, south of US Highway 2, north of 10th Street NE, and west of 3rd Avenue NE. The subject property consists of one parcel (i.e., 83.02308.00), totaling approximately 10.55 acres. See Appendix A for a detailed description of the parcels. This information was obtained from the Polk County GIS website.

The location of the subject property is shown on Figure 1, which contains excerpts from the United States Geological Survey (USGS) 7.5-minute topographic quadrangle maps for Grand Forks, North Dakota and Mallory, Minnesota.

3.2 Site and Vicinity General Characteristics

The subject property is located in the northwest quadrant of the intersection of 3rd Avenue NE and 10th Street NE, encompasses approximately 10.55 acres owned by Simplot Potato Proc Inc., and is currently undeveloped. However, remnants of past usage are still present (i.e., concrete slabs and abandoned rail spurs). The general area is characterized as a mix of small businesses, roadway, and single-family and multifamily residential developments. The immediate adjacent property to the west is a Circle K gas station and convenience store/State Farm Insurance/Cherry Berry and to west is Ryan Potato Company warehouses. To the north, across US Highway 2 is several small businesses and to the south, across 10th Street NE is developed Polk County DAC and single and multi-family residences.

3.3 Current Use

The subject property is currently unoccupied.

3.4 Descriptions of Structures, Roads, and Other Improvements on the Site

The subject property is currently undeveloped. However, several concrete slabs from previous warehouses/sheds and some gravel drive areas are remnants of past development. Two abandoned rail spurs were observed to be partially buried. Most of the remaining property is grass surfaced.

The subject property can be accessed, by vehicle, from 10th Street NE to the south, from 3rd Street NE to the east, and from the service road that runs along US Highway 2 to the north. The subject property can be accessed by foot from all directions. The subject property has access to electric, telephone, cable, natural gas, municipal water, sanitation, and municipal sewer utilities.
.

3.5 Current Uses of Adjoining Property

Development on adjacent properties is as follows:

- North – US Highway 2, McDonalds, Domino's Pizza, Subway, and other small businesses.
- South – 10th Street NE, Polk County DAC, and several multi-family and single-family residences.

- East – Ryan Potato Company warehouses
- West – Circle K gas station and convenience store/State Farm Offices/Cherry Berry.

4. USER PROVIDED INFORMATION

4.1 Title Records

Title records for the subject property were not reviewed for this Phase I ESA.

4.2 Environmental Liens/Activity and Use Limitations

It is the user's responsibility to check title records for environmental liens or activity and use limitations; none were indicated by the user.

4.3 Specialized Knowledge

No specialized knowledge was provided by the user.

4.4 Valuation Reduction for Environmental Knowledge

The user does not have any information indicating there is a valuation reduction from environmental information for this property.

4.5 Owner, Property Manager and Occupant Information

The subject property, owned and managed by Simplot Potato Proc Inc., is currently unoccupied.

4.6 Reason for Performing a Phase I ESA

The purpose of this Phase I ESA is to identify, to the extent feasible, RECs in connection with the subject property. The Phase I ESA was requested by the City of East Grand Forks to fulfill due diligence requirements prior to a property and/or financial transaction.

4.6 Other

No other information was provided by the user.

5. RECORDS REVIEW

5.1 Environmental Record Sources

An environmental database records search with risk assessment was completed by Historical Information Gatherers (HIG) and reviewed by Widseth on May 27th, 2025. The database report (Appendix B) contains a complete listing of the federal, state, and tribal databases searched. A partial listing of databases that may contain records for sites within ASTM minimum search distances is included below:

FEDERAL RECORDS

- **NPL:** National Priority List (NPL)
- **PROPOSED NPL:** NPL – Proposed Sites
- **DELETED NPL:** Deleted NPL Sites
- **SEMS:** Superfund Enterprise Management System (SEMS)
- **SEMS ARCHIVE:** SEMS Archived Site Inventory
- **ODI:** Inventory of Open Dumps
- **CERCLIS:** Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS)
- **IODI:** Open Dumps on Indian Lands
- **CERCLIS NFRAP:** CERCLIS– No Further Remedial Action Planned
- **CERCLIS LIENS:** CERCLIS Liens
- **RCRA CORRACTS:** Resource Conservation and Recovery Act (RCRA) Corrective Action Program
- **RCRA TSD:** RCRA Treatment, Storage, and/or Disposal Facilities
- **RCRA LQG:** RCRA Large Quantity Generators
- **RCRA SQG:** RCRA Small Quantity Generators
- **RCRA VSQG:** RCRA Very Small Quantity Generators
- **RCRA NON-GEN:** RCRA Non-Generators
- **RCRA CONTROLS:** RCRA Sites with Institutional Controls
- **FED ENG:** Federal List of Engineering Controls
- **FED INST:** Federal List of Institutional Controls
- **LUCIS:** Land Use Control Information System
- **NPL IC:** Institutional Controls at NPL Sites
- **ERNS 1982 TO 1986:** Emergency Response Notification System 1982-1986
- **ERNS 1987 TO 1989:** Emergency Response Notification System 1987-1989
- **ERNS:** Emergency Response Notification System
- **FED BROWNFIELDS:** Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database
- **FEMA UST:** Federal Emergency Management Agency (FEMA) Underground Storage Tank Listing
- **FRP:** Facility Response Plans
- **DELISTED FRP:** Delisted Facility Response Plans
- **HIST GAS STATIONS:** Historical Gas Stations
- **REFN:** Petroleum Refineries

- **BULK TERMINAL:** Petroleum Product and Crude Oil Rail Terminals
- **SEMS LIEN:** Lien on Property
- **SUPERFUND ROD:** Superfund Records of Decision
- **DOE FUSRAP:** Formerly Utilized Sites Remedial Action Program
- **FINDS/FRS:** Facility Registry Service/Facility Index
- **TRIS:** Toxics Release Inventory Program
- **PFAS NPL:** PFOA/PFOS Contaminated Sites
- **PFAS FED SITES:** Federal Agency Locations with Known or Suspected PFAS Detections
- **PFAS SSEHRI:** Social Science Environmental Health Research Institute (SSEHRI) PFAS Contamination Sites
- **ERNS PFAS:** National Response Center PFAS Spills
- **PFAS NPDES:** PFAS NPDES Discharge Monitoring
- **PFAS TRI:** PFAS Releases from Toxic Release Inventory
- **PFAS WATER:** Perfluorinated Alkyl Substances (PFAS) Water Quality
- **PFAS TSCA:** PFAS TSCA Manufacture and Import Facilities
- **PFAS E-MANIFEST:** PFAS Waste Transfers from RCRA e-Manifest
- **PFAS IND:** PFAS Industry Sectors
- **HMIRS:** Hazardous Materials Information Reporting System
- **NCDL:** National Clandestine Drug Labs
- **TSCA:** Toxic Substances Control Act (TSCA)
- **HIST TSCA:** Historical TSCA
- **FTTS ADMIN:** FIFRA/TSCA Tracking System (FTTS) Administrative Case Listing
- **FTTS INSP:** FTTS Inspection Case Listing
- **PRP:** Potentially Responsible Parties List
- **SCRD DRYCLEANER:** State Coalition for Remediation of Drycleaners Listing
- **ICIS:** Integrated Compliance Information System
- **FED DRYCLEANERS:** Drycleaner Facilities
- **DELISTED FED DRY:** Delisted Drycleaner Facilities
- **FUDS:** Formerly Used Defense Sites
- **FUDS MRS:** FUDS Munitions Response Sites
- **FORMER NIKE:** Former Military Nike Missile Sites
- **PIPELINE INCIDENT:** Pipeline and Hazardous Materials Safety Administration (PHMSA) Pipeline Safety Flagged Incidents
- **MLTS:** Material Licensing Tracking System
- **HIST MLTS:** Historic MLTS Sites
- **MINES:** Mines Master Index File
- **SMCRA:** Surface Mining Control and Reclamation Act Sites
- **MRDS:** Mineral Resource Data System
- **LM SITES:** Department of Energy (DOE) Legacy Management Sites
- **ALT FUELS:** Alternative Fueling Stations
- **CONSENT DECREES:** Superfund Consent Decrees
- **AFS:** Air Facility System
- **SSTS:** Registered Pesticide Establishments
- **PCBT:** Polychlorinated Biphenyl (PCB) Transformers
- **PCB:** PCB Notifiers

STATE RECORDS

One hundred twenty-two unmappable records were listed in the database report due to incomplete or inadequate address information (page 583-592 of Appendix B). Ninety-six of these sites are associated with the American Crystal Sugar plant located over 0.5 miles to the south of the subject property. Research into their locations did not provide better addresses. However, based on observations made during the site reconnaissance, only one site (i.e., Ryan potato Co) appears to be adjacent to the subject property. It is listed as a RCRA NON-GEN site and should not be a risk to the subject property. In addition, the site listed as TS Express is believed to be located approximately one block to the south and is listed as a SPILL site. It is likely associated with the former TS Express Bulk Site (Site ID #10 above) that was investigated and closed in 2009.

5.2 Additional Environmental Record Sources

The MPCA “What’s in My Neighborhood?” website was searched for known and potential sources of contamination within a half mile of the subject property. The data includes:

- Properties that were previously contaminated and those being investigated for contamination.

- Facilities with air, water, and other environmental permits and registrations, and those that have applied.
- Facilities the MPCA has penalized for environmental violations.
- Projects under environmental review.
- Emergency management activities.
- Pollution prevention projects.

The WIMN search identified no nearby active leak sites. However, the search did identify several facilities as historic underground storage tank leak and/or remediation sites, spills sites, or an incident site. Because the site files have been closed on these sites, the regulating agency has determined that any remaining contamination is not a risk to the leaksite properties or any adjacent and nearby properties. A map of the search area is included in Appendix C.

Similarly, the Minnesota Department of Agriculture (MDA) "What's in My Neighborhood?" website was searched for agricultural chemical investigations within a half mile of the subject property. The data includes:

- *Old Emergencies:* MDA Agricultural Chemical Incident Response Unit investigations which were closed prior to March 1, 2004.
- *Small Spills and Investigations:* points representing small agricultural chemical spills and investigations.
- *Incident Investigation Boundaries:* polygons that outline the approximate boundary of areas being investigated.
- *Contingency Areas:* investigations that have been closed with contingencies attached.

Three agricultural chemical investigation sites were identified within the half mile search radius from the subject property. One site was listed as an Old Emergency Incident and the remaining two sites were incident investigations. All three of these sites are listed as either closed or inactive. Because the site files have been closed on two of these sites, the regulating agency has determined that any remaining contamination is not a risk to the incident properties or any adjacent and nearby properties. Because of the distance from the subject property, the inactive site is also likely not a risk issue.

5.3 Physical Setting Sources

The following information was obtained from United States Geological Survey (USGS), United States Department of Agriculture (USDA) and Minnesota Geological Survey (MGS) publications.

Regional Geology/Hydrogeology

The subject property is characterized by extremely flat topography. This flat topography is characteristic of the Glacial Lake Agassiz lake plain. The

elevation at the site is approximately 829 feet above the National Geodetic Vertical Datum (NGVD). The Red River of the North is located approximately two thousand feet west of the site. United States Geological Survey (USGS) and Minnesota Geological Survey MGS) publications indicate the region is located in an area of deep-water lake deposits dominated by gray to blue-gray clay, plastic, and dense. Lenses of silt and very fine sand are common throughout the clays. Glacial till, composed of a mixture of clay, silt, sand, and gravel, commonly underlies the lake clays. Lake clay deposits in this region can reach thicknesses of 150 feet and overlie tills of over 150 feet thick. There are some alluvial deposits consisting of a mix of clay, silt, and sand along the river channels. Below the till are sedimentary sandstone, limestones, and shales followed by crystalline bedrock. The bedrock in this region is commonly encountered at depths of three hundred plus feet below land surface and is generally characterized as a Precambrian chlorite schist.

Deeper groundwater can also be found in buried outwash deposits within the till deposits. The deep regional groundwater flow direction was not determined, but it is expected to be in a westerly direction as illustrated in the USGS Hydrogeologic Atlas, HA-346, 1970.

Local Geology/Hydrogeology
A surficial water table is present in most of the surficial clays throughout the area at an approximate depth of 5 to 15 feet below the ground surface. This depth depends on the time of year and the amount of precipitation input. Groundwater flow within this water table is characteristically slow but is probably to the west, toward the Red River of the North.

5.4 Historical Use Information on the Property

Historical information was collected and reviewed to identify past land use and document the presence of possible RECs associated with the subject property. Below is a synopsis of the results of historical research.

Aerial Photographs
Aerial photographs from 1939, 1948, 1952, 1954, 1962, 1966,1971, 1974, 1981, 1983, 1988, 1991, 1997, 2003, 2008, 2013, 2019, and 2023 were reviewed and are included in Appendix D. The following is a brief synopsis of the subject property and immediate vicinity:

- 1939 – The southwest portion of the subject property appears to be developed, but the nature of the development cannot be determined. The remaining portion of the subject property appears to be tilled farmland. A grain elevator and railroad tracks are to the south and southwest.
- 1948, 1952, & 1954 – The subject property appears to have had several additional structures built since the 1939 aerial, including two machine storage structures in the northwest portion of the subject property and

an additional building along the railroad spur located in the south-central portion of the property. The adjacent property to the south, east, and west appear relatively unchanged. The nature of all of these developments could not be determined from the photographs.

- 1962 & 1966 – Several new structures are present on the subject property. They include a large warehouse in the east-central portion of the property, two smaller structures in the southwest corner of the property, and a smaller structure in the central portion of the property. The concrete slabs associated with the smaller central structure and the large warehouse structure are still present on the property. Development has begun on adjacent properties to the north and northwest.
- 1971 & 1974 – No significant changes are present on the subject property. One of the smaller structures appears to have been removed. Additional structures have been added to the adjacent property to the east and structures removed from the adjacent property to the west.
- 1981, 1983 & 1988 – Several of the smaller structures have been removed from the subject property. The adjacent gas station/convenience store is present to the west and an addition has been added to one of the adjacent structures to the east. The poor quality of the 1988 aerial prevents any significant observations.
- 1991 & 1997 – The subject property does not appear to have any significant changes. Changes are also evident to the properties north of US Highway 2 and 10th Avenue NE has been developed to the south.
- 2003 – The subject property remains unchanged. The adjacent property to the west has been remodeled into the service station as evidenced by the presence of the dispenser canopy to the south of the station and the presence of the car wash. The elevator to the southwest has been removed and the Burger King restaurant has been built. No other significant changes are evident on the adjacent properties to the north and east.
- 2008 – No significant changes from the 2003 aerial are present on the subject property. Several new structures are present on the property to the south.
- 2013, 2019, & 2023 – The remaining structures on the subject property have been removed and only the concrete slabs remain. The subject and adjacent properties appear as observed during the site reconnaissance.

Fire Insurance Maps

A Sanborn Fire Insurance Map search is commonly performed as part of the historical background search. Sanborn maps were generated by the Sanborn Map Company to aid in assessing fire insurance liabilities in urbanized areas in over 12,000 US cities, prior to the early 1950s. Other fire insurance map companies including the Fire Underwriters Inspection Bureau also produced fire insurance maps. Information presented on fire insurance maps include things such as building size, shape, address,

construction materials, owner/business name, usage, and age. Sanborn Maps were available for the years of 1888, 1897, 1904, 1909, 1914, 1926, 1943, and 1950.

- 1988, 1897 & 1904 – The subject property is not represented on these maps. The adjacent property to the west appears to be a residential dwelling and the property to the southwest is developed as a grain elevator labeled as the Monarch Elevator Company. The street to the west is labeled as Dovry Avenue.
- 1909, 1914 & 1926 – The subject property is not represented on these maps. The elevator is still present to the southwest and a residence to the west.
- 1943 – The subject property is still not represented. The elevator to the south shows several additions.
- 1950 – The subject property is still mostly unrepresented. However, two machine storage buildings are present in the very northwest portion of the subject property. The two machine storage buildings correspond to the two concrete slabs observed in the site reconnaissance. The small auto repair shop located south of the machine shops may touch the subject property but appears to be just south and west of the subject property.

Copies of the Sanborn Maps are included as Appendix D, for reference.

Historical & Topographic Maps

Five historical USGS 7.5 & 15-minute topographic maps for Grand Forks, ND (1934, 1938, 1963, 1979, 1994, 2011, 2014, 2017, 2020, and 2024) were available for review to aid in documenting the history of the subject property and adjacent properties. These maps are included in Appendix F, for reference.

The 1934 & 1938 topographic maps indicate the only development on the subject property is a railroad spur in the southeast portion of the property. No development is indicated on the adjacent properties to the east and north. Small structures, consistent with the residential dwellings observed on the fire insurance maps are present to the west, as is the railroad to the south. The 1963 topographic map indicates the presence of several structures on the subject property and additional development on the properties to the north, south, west, and east. Although, the nature of these developments cannot be determined from the topographic map, several of the structures match up to the concrete slabs observed on the subject property during the site reconnaissance. US Highway 2 is also present in the 1963 map. The 1979 topographic map indicates additional development to the north and northwest. Several smaller structures to the west of the subject property have been removed. By 1994, the smaller structures to the west have been removed and a larger structure is present. Another large structure has also been added to the east. No development is shown on the subject property on the 2011, 2014, and 2017 topographic maps.

No additional historical or topographical maps were available for review for the subject property.

City Directories
A city directory search was obtained as part of the historical background search. Based on the parcel number, the subject property was not present on any of the city directories from 1953, 1958, 1963-1964, 1969, 1974, 1980, 1985, 1990, 1995, 2000, 2003, 2008, 2013, 2018, or 2023. However, a property with the address of 1022 Central Avenue and labeled as Simplot J R Co warehouse was listed on the 1995, 1990, 1985, and 1980 city directories. This listing may represent the subject property. In the 1974 directory, the 1022 Central Avenue address was listed as the Jiffy Fry-Formost Foods warehouse. The 1022 address was not present on any of the other directories.

The listing of the Hagen potato warehouse at 1012 Central Avenue NE may also represent the subject property. This listing is present on the 1958 and 1963-1964 directories. By 1969, this address was listed as KRAD radio station. No more listings were found for this address,

The adjacent property to the west is listed as a private residence in city directories from 1953 through 1974. In 1980, this property is listed as the East Grand Station restaurant and in 1985 as Shenanigans Tavern. In the 1995 directory, this property was comprised of numerous small businesses including tele consultants, massage therapy, Subway Sandwiches, chiropractor, a newspaper, Hardware Hank, and a beauty salon. By 2000 most of these businesses are gone and only Subway, the hair salon, and State Farm Insurance are listed. By 2003, Subway is gone, and East Grand Station and Hot Stuff Pizza are present. Between 2008 and 2013, the East Grand Station has changed to Holiday Stationstore.

The adjacent grain elevator to the southwest is listed on the 1953 through 1974 directories as 1004 Central Avenue NE. In 1980, the 1004 Central Avenue NE address was listed as Stennes Law Office and by 1985 the address is listed as vacant. No other listings were found for this address. However, the adjacent former Burger King restaurant was listed in the 2003 directory at the address of 926 Central Avenue NE.

A copy of the city directory search results is included in Appendix E for reference. No other information was obtained from the city directories search.

Property Information
No additional property information was obtained as part of this Phase I ESA.

6. SITE RECONNAISSANCE

6.1 Methodology and Limiting Factors

On May 13, 2025, Ty Fuglseth, Widseth environmental scientist, conducted a site reconnaissance to collect data and observe environmental conditions related to the subject property and any structures located on the premises to the extent not obstructed by adjacent buildings, bodies of water, bituminous or other paved surfaces or by limiting conditions such as snow or rain. Photographs documenting site conditions, at the time of the site reconnaissance, are included in Appendix H.

6.2 General Site Setting

The site is located in northeastern East Grand Forks, Minnesota. The subject and surrounding properties are characterized as a mix of commercial businesses and single and multi-family residential developments. Third Avenue NE forms the eastern property boundary, 10th Street forms the southern boundary, and the gravel service road forms the northern boundary.

6.3 Exterior Observations

The property grounds are mostly grass surfaced and appeared to be in good condition. Four concrete slabs are present on the subject property. These slabs are remnants left after previous buildings were removed. Two former railroad spurs were also observed during the site visit. Most of the tracks are buried but can be seen at the surface in several locations. See figure 2 for their approximate locations. A buried steel pipe was also observed south of the large concrete slab. The usage of this pipe is unknown. In general, the property grounds are clean and well kept.

Underground Storage Tanks (UST)
No USTs were observed on the subject property during the site reconnaissance.

Aboveground Storage Tanks (AST)
No petroleum ASTs were observed on the subject property during the site visit.

Polychlorinated Biphenyls (PCBs)
No PCBs or PCB-containing equipment was observed during the site visit. The City of East Grand Forks Water and Light was also contacted about the presence of PCB containing electrical transformers. They stated that there are no PCB containing transformers on or adjacent to the subject property.

Solid Waste Disposal
No disposal of solid waste was observed during the site visit.

Soil Staining
No soil staining was observed on the subject property during the site visit.

Pavement Staining
No pavement was present on the subject property. In addition, no staining was observed on the concrete slabs that remain after the structures were removed.

Stressed Vegetation
No stressed vegetation areas were observed during the site visit.

On-Site Water Wells
No on-site water wells were observed on the property during the site visit.

Hazardous Substance and Petroleum Products Containers
No hazardous materials or petroleum product containers were observed during the site visit.

Unidentified Substance Containers
No unidentified substance containers were observed during the site visit.

Septic Systems
No septic system was observed on the subject property during the site visit.

Pits, Ponds, or Lagoons
No pits, ponds, or lagoons associated with waste treatment or disposal, were observed on the subject property during the site visit.

Fill Material
No fill material was observed on the subject property during the site visit.

Miscellaneous Concerns
No other miscellaneous concerns were observed during the site visit.

6.4 Interior Observations

No structures were present on the subject property and therefore, no interior observations were made.

7. INTERVIEWS

7.1 Interview with Owner

Mr. David Anderson, Simplot Potato Warehouse Manager and owner's representative for the subject property, was contacted about the current site

conditions and site history of the subject property. Mr. Anderson was interviewed by phone and provided or confirmed the following information:

- Mr. Anderson stated that the property has been owned by Simplot since approximately 1980 and is currently undeveloped.
- He stated that the subject property was used for potato storage and some equipment storage.
- He did not know who owned the property prior to Simplot and was unaware of the past use of the property.
- He stated that Simplot did not have any underground or aboveground petroleum or hazardous material storage tanks on the subject property.
- He stated that he was not aware of any fires or spills of petroleum products or hazardous materials.
- Mr. Anderson was not aware of any other environmental issues associated with the subject or adjacent properties.

7.2 Interview with Occupants

The subject property is unoccupied and therefore, no additional information is warranted in this section.

7.3 Interview with Site Manager

The site is managed by the owner. Because the owner's representative was interviewed in Section 7.1, no additional information is presented in this section.

7.4 Interview with Local Government Officials

Widseth contacted the East Grand Forks Fire Department to request information on whether they have responded to any incidents (e.g., fires, releases of petroleum products or hazardous substances) on the subject property or adjacent properties or were aware of any other areas of environmental concern. Jeff Boushee, Fire Chief for the East Grand Forks Fire Department was contacted about the subject property. He stated that. The fire department had no records of any historical problems (i.e., fires or chemical spills/releases) with respect to the Simplot property.

No other interviews were conducted as part of this Phase I ESA.

8. FINDINGS

The subject property consists of parcel No. 83.02308.00 encompassing approximately 10.55 acres. The subject property, partially developed prior to 1939, included several structures and a railroad spur. However, the nature of the property

usage was not determined during this assessment. Additional development included the addition of several other structures throughout the property. The subject property is owned by Simplot Potato Proc Inc. (Simplot) and is currently undeveloped. Historical research and interviews indicated the subject property was used by Simplot for potato and equipment storage since the early 1980s until their new facility was built sometime prior to 2011.

The subject property has access to public utilities including electric, sewer, water, natural gas, and telecommunications. The surrounding properties are characterized by various commercial developments to the north, east, and west, and residential property to the south.

During the site reconnaissance, the subject property appeared to be in good condition and well-kept with no observed evidence of spills/releases of petroleum products or hazardous materials.

Interviews with people knowledgeable with the subject property did not reveal any items of environmental concern.

A records search indicated that the subject property was not included on any of the searched environmental databases. However, two immediately adjacent sites were identified in the database search. The first is the former Holiday Station Store #3547 (now Circle K). This site is listed on the UST, HIST SPL, and a SPILLS databases. The SPILLS and HIST SPL designations are associated with a wash water issue related to the car wash. Although this site is a UST site, it has not had any reported leaks. This site is therefore not considered a REC and is not a risk to the subject property. The second site is the Ryan Potato wash plant located to the east of the Simplot property. This site was identified as a HIST LAST site (LS0018121). The leaksite was investigated under the direction of the Minnesota Pollution Control Agency (MPCA). The leaksite was closed in 2013 because it was determined that any remaining contamination is not a risk to the leaksite or adjacent properties. This site is considered a CREC and is not a risk to the subject property.

This assessment has not revealed the presence of any RECs in association with the subject property.

9. OPINION

This assessment has revealed no RECs in association with the subject property.

No evidence of past or present release of hazardous substances or petroleum products to the environment (i.e., leaks) or material threat of a future release on the subject property or adjacent properties was identified during the records review, site reconnaissance, or interviews with present site owners and local government officials.

All nearby historic release sites have been investigated and/or clean-up under MPCA regulatory guidance and review by the MPCA. Upon completion of the

required investigation and determining that any remaining contamination associated with this release is not a risk to human health or the environment, the MPCA closed the respective site files. Therefore, these sites are considered CRECs and are not a risk to the subject property.

10. CONCLUSIONS

Widseth has performed a Phase I ESA in conformance with the scope and limitations of ASTM Designation E 1527-21 of the Simplot property (Parcel No. 83.02308.00), in East Grand Forks, MN. Any exceptions to, or deletions from, this practice are described in Section 2.4 of this report.

This assessment has revealed no RECs in association with the subject property.

11. DEVIATIONS

No deletions or deviations from the ASTM standard were utilized during the preparation of this Phase I Environmental Site Assessment.

12. ADDITIONAL SERVICES

No additional services were completed as part of this Phase I ESA.

14. SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the project area. We have developed and performed the “all appropriate inquiries” in conformance with the standards and practices set forth in 40 CFR Part 312.

15. STAFF QUALIFICATIONS

Widseth has been performing environmental work and conducting ESAs for more than 25 years. To date, Widseth has completed more than three hundred Phase I and Phase II ESAs on a wide variety of businesses and industries. Qualifications of the principal Phase I ESA staff are provided below.

Ty Fuglseth, P.G.
Environmental Scientist

Ty graduated in 1987 from North Dakota State University, with a B.S. in Geology, and in 1991 from the University of South Carolina with an M.S. in Geology, with an emphasis in Marine Sedimentology and Isotope Geochronology.

Before joining Widseth, Mr. Fuglseth worked as a geologist/project manager for an environmental consulting firm in Charlotte, North Carolina for over two years. There he gained experience in performing environmental site assessments and remedial investigations. He is familiar with soil boring screening and logging, monitoring well installation and sampling, free product recovery, and aquifer testing.

Mr. Fuglseth joined Widseth in March 1995 and has gained additional experience in remedial investigations and hydrogeologic assessments.

Since working as an environmental consultant, Mr. Fuglseth has conducted over one hundred environmental property assessments that involved researching site uses and the geology/hydrology of the site and surrounding area as well as subsurface investigations. Each assessment includes a site reconnaissance to observe existing conditions and indications of potential contamination. He has conducted dozens of remedial investigations or equivalent environmental contamination assessments in several states, including Minnesota, North Dakota, South Carolina, North Carolina, Georgia, and West Virginia. He has also conducted dozens of hazardous material and regulated waste inspections of county bridges for numerous counties throughout Minnesota.

Mr. Fuglseth is registered as a professional geologist (PG No. 30721) by the Minnesota Board of AELSLAGID and certified as an asbestos and lead inspector

by the Minnesota Department of Health and the North Dakota Department of Environmental Quality. Mr. Fuglseth maintains HAZWOPER certification through annual refresher training.

Dan McInnis, Ph.D.
Environmental Scientist

Dan graduated from the University of Notre Dame in 2008 with a B.S. in Environmental Geosciences, 2011 with an M.S. in Geological Sciences, and 2014 with a Ph.D. in Earth Sciences, with an emphasis in Groundwater Hydrology and Environmental Surface Chemistry. From 2014-2016, he served as a post-doctoral associate in Environmental Health Sciences at the University of Minnesota, where he worked on remediation of persistent organic pollutants.

Dr. McInnis joined Widseth in 2022, after four years in higher education and two years in the private sector as a field technician and environmental consultant. He has performed Phase I and Phase II environmental site assessments, remedial investigations, and hydrogeologic assessments at project sites across the Upper Midwest and Great Plains states. His experience includes field screening and characterization of soils, monitoring well installation and aquifer testing, sampling of environmental media (soil, groundwater, and surface water), conceptual site model development, application of direct-sensing techniques, and in-situ remediation.

Dr. McInnis is certified as a Geologist-in-training (GIT No. 160928) by the Minnesota Board of Architecture, Engineering, Land Surveying, Landscape Architecture, Geoscience, and Interior Design (AELSLAGID) and maintains Hazardous Waste Operations and Emergency Response (HAZWOPER) certification through annual refresher training.

Comments: The waste water from the carwash when being operated bubbles up and goes to the storm sewer. The storm sewer goes to, after miles of travel, the Red River. The City of East Grand Forks - WWTP is monitoring the situation and will begin the sampling process as needed. The city is working with Holiday Station stores.

Comments: Driver hooked up to old loading pipe to unload, noticed fuel bubbling up around the pipe. The pipes/tanks were taken out last week. Notified East Grand Forks FD, they are currently onscene. Keith Yokum, Holiday, notified. No clean up contractor that he knows of. Tom Stordahl, VP-General Manager / cell 701-238-9922 / 800-345-8163.

Description of Events: Driver arrived at delivery location and hooked his hose to the satellite drop site and started the delivery. This station was having some concrete work done. Unknown to the driver the satellite drop site was disconnected and not locked out the new drop site was under tarps where the new concrete was poured. After a few minutes product was noticed under the tarps, the tarps were pulled back and the mistake was discovered. The driver then finished unloading the product into the correct site. A spill response team was called in and product was pumped out from around the tank basin. The remediation process is proceeding under the guide lines of Minnesota's MPCA. MPCA SPILL #16651

Comments:	Caller reporting some spills. There is contaminated gravel in the parking lot. Pumps leak. Truck wash and drive through car wash that is not properly maintained. Farmers are coming through and chemicals getting dumped that shouldn't be. Trucks being parked over the floor drain & leaking overnight, sometimes up to 2 gallons at a time. Puddles on west side of building of parking lot & big dark spots. Every time you put fuel in your truck you have to step in diesel. Complaints on safety issues & concerns. Craig Scheer is the manager. Issue has been brought up		

to him in the past. Public Safety issues. Grates missing over the floor drain or you could easily step in 2' trench. Faulty warning. Light poles knocked over in parking lot and wires sticking out and not capped off. Garage door unsafe and needs to be replaced. 14' overhead garaged door not maintained. Ladder on wheels used to climb up to the top of their trucks has rusted out steps. Make fast food with a deep fryer i

Comments: Caller received an email regarding a fish kill reported in Grand Forks ND in the Red River from a fishing guide who's name is Karry Kyllo, Grand Forks ND, Contact number (701) 740-1749. The dead fish are reported as channel catfish. He had counted over 330 dead catfish which range from under 1' up to 20 lb in a fairly short stretch of river. Haven't determined how far fish kill extends to south. Above normal mortality the past several weeks but the numbers have seem to increase greatly in the past week.

Comments: A truck has a massive leak, trying to contain and find where the leak is coming from, it is on one of the Grower's truck; Kyle Hacki, 218-739-1063Dump truck to piler, leaked at the piler onto the soil and concrete. For clean up will try to scrape it up and into a big loader bucket and disperse it while spraying with water.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13 and E1527-21, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

National Priority List: NPL

The U.S. Environmental Protection Agency (EPA)'s National Priorities List (NPL) includes the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program, based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action. This data includes NPL sites represented as polygons, where available, that can be sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS). These site boundaries represent the footprint of a whole site, the sum of all the Operable Units (OUs) and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. As site investigation and remediation progress, OUs may be added, modified or refined. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Dec 13, 2024

National Priority List - Proposed: PROPOSED NPL

Sites proposed by the U.S. Environmental Protection Agency (EPA), the state agency, or concerned citizens for addition to the National Priorities List (NPL) due to contamination by hazardous waste and identified by the EPA as a candidate for cleanup because it poses a risk to human health and/or the environment. Sites represented as polygons, where available, can be sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS). These site boundaries represent the footprint of a whole site, the sum of all the Operable Units (OUs) and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Dec 13, 2024

Deleted NPL: DELETED NPL

Sites deleted from the U.S. Environmental Protection Agency (EPA)'s National Priorities List (NPL). The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate. Sites represented as polygons, where available, can be sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS). These site boundaries represent the footprint of a whole site, the sum of all the Operable Units (OUs) and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Dec 13, 2024

SEMS List 8R Active Site Inventory: SEMS

The U.S. Environmental Protection Agency's (EPA) Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. This data includes SEMS sites from the List 8R Active file as well as applicable sites from the EPA's Facility Registry Service map tool.

Government Publication Date: Feb 26, 2025

Inventory of Open Dumps, June 1985: ODI

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

SEMS List 8R Archive Sites: SEMS ARCHIVE

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. This data includes sites from the List 8R Archived site file.

Government Publication Date: Feb 26, 2025

EPA Report on the Status of Open Dumps on Indian Lands: IODI

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

Comprehensive Environmental Response, Compensation and Liability Information System - CERCLIS: CERCLIS

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

CERCLIS - No Further Remedial Action Planned: CERCLIS NFRAP

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens: CERCLIS LIENS

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA). This database was provided by the United States Environmental Protection Agency (EPA). Refer to SEMS LIEN as the current data source for Superfund Liens.

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action: RCRA CORRACTS

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Jan 6, 2025

RCRA non-CORRACTS TSD Facilities: RCRA TSD

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites that have indicated engagement in the treatment, storage, or disposal of hazardous waste which requires a RCRA hazardous waste permit.

Government Publication Date: Jan 6, 2025

RCRA Generator List: RCRA LQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: Jan 6, 2025

RCRA Small Quantity Generators List: RCRA SQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: Jan 6, 2025

RCRA Very Small Quantity Generators List: RCRA VSQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

Government Publication Date: Jan 6, 2025

RCRA Non-Generators: RCRA NON GEN

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Jan 6, 2025

RCRA Sites with Controls: RCRA CONTROLS

List of Resource Conservation and Recovery Act (RCRA) facilities with institutional controls in place. RCRA gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances.

Government Publication Date: Jan 6, 2025

Federal Engineering Controls-ECs: FED ENG

List of Engineering controls (ECs) made availabe by the United States Environmental Protection Agency (EPA). ECs encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. The EC listing includes remedy component data from Superfund decision documents for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Mar 27, 2025

Federal Institutional Controls- ICs: FED INST

List of Institutional controls (ICs) made available by the United States Environmental Protection Agency (EPA). ICs are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site. The IC listing includes remedy component data from Superfund decision documents for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Mar 27, 2025

Land Use Control Information System: LUCIS

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

Government Publication Date: Sep 1, 2006

Institutional Control Boundaries at NPL sites: NPL IC

These boundaries of Institutional Control areas at sites on the U.S. Environmental Protection Agency's (EPA) National Priorities List (NPL), or as Proposed or Deleted, are sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS). The EPA's NPL includes the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. Institutional controls are non-engineered instruments such as administrative and legal controls that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes.

Government Publication Date: Nov 20, 2024

Emergency Response Notification System: ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System: ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System: ERNS

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

Government Publication Date: Dec 31, 2024

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database: FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This data is provided by the United States Environmental Protection Agency (EPA) and includes Brownfield sites from the Cleanups in My Community (CIMC) web application.

Government Publication Date: Feb 19, 2025

FEMA Underground Storage Tank Listing: FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

Facility Response Plan: FRP

This listing contains facilities that have submitted Facility Response Plans (FRPs) to the U.S. Environmental Protection Agency (EPA). Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit FRPs. Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments. This listing includes FRP facilities from an applicable EPA FOIA file and Homeland Infrastructure Foundation-Level Data (HIFLD) data file.

Government Publication Date: Jan 9, 2024

Delisted Facility Response Plans: DELISTED FRP

Facilities that once appeared in - and have since been removed from - the list of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: Jan 9, 2024

Historical Gas Stations: HIST GAS STATIONS

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

Government Publication Date: Jul 1, 1930

Petroleum Refineries: REFN

This list of petroleum refineries is sourced from the U.S. Energy Information Administration (EIA), Refinery Capacity Report. The listing includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year. The geographic area the report covers is the 50 States, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, Guam, and other U.S. possessions. Per the EIA, the facility location data represents the approximate location based on research of publicly available information from sources such as Federal agencies, company websites, and satellite images on public websites.

Government Publication Date: Oct 31, 2024

Petroleum Product and Crude Oil Rail Terminals: BULK TERMINAL

A list of petroleum product and crude oil rail terminals from the U.S. Energy Information Administration (EIA), as well as petroleum terminals sourced from Oak Ridge National Laboratory hosted by the Homeland Infrastructure Foundation-Level Database. Data includes operable bulk petroleum product terminals with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil with activity between 2017 and 2018. EIA petroleum product terminal data comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings.

Government Publication Date: Oct 31, 2024

LIEN on Property: SEMS LIEN

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) provides Lien details on applicable properties, such as the Superfund lien on property activity, the lien property information, and the parties associated with the lien.

Government Publication Date: Jan 29, 2025

Superfund Decision Documents: SUPERFUND ROD

This database contains a list of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include completed Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD) for active and archived sites stored in the Superfund Enterprise Management System (SEMS), along with other associated memos and files. This information is maintained and made available by the U.S. Environmental Protection Agency.

Government Publication Date: Feb 26, 2025

State

Minnesota Permanent List of Priorities: PLP

The state Superfund sites in Minnesota are listed on the Minnesota Permanent List of Priorities (PLP). The hazardous waste sites on the PLP are in various stages of remediation. At these sites investigation and cleanup are needed, cleanup is underway, or cleanup has been completed and long-term monitoring or maintenance continues. This data is made available by the Minnesota Pollution Control Agency (MPCA). This database serves a purpose similar to that of the federal NPL, functioning as a state-level counterpart for prioritizing cleanup efforts at hazardous substance release sites.

Government Publication Date: Feb 6, 2025

Delisted Permanent List of Priorities (PLP): DEL PLP

This list contains sites that were previously included - and have since been removed from - the Permanent List of Priorities (PLP) maintained by Minnesota's Pollution Control Agency (MPCA) but have now been delisted.

Government Publication Date: Feb 7, 2025

Minnesota Site Remediation Section Database: SHWS

The Site Remediation Section identifies, investigates, and determines appropriate cleanup plans for abandoned or uncontrolled hazardous waste sites where a release or potential release of a hazardous substance poses a risk to human health or the environment. This data is made available by the Minnesota Pollution Control Agency (MPCA)'s Site Remediation Section. This database serves a purpose similar to that of the federal Superfund Enterprise Management System (SEMS), functioning as a state-level counterpart for tracking potential hazardous substance release sites.

Government Publication Date: Feb 6, 2025

MPCA Site Assessment and Emergency Response Sites: SITE ASSESSMENT

List of active and closed sites that are currently under site assessment by Minnesota Pollution Control Agency (MPCA) and are a part of MPCA Remediation Sites list, and Emergency Management Sites where a chemical spill or some other environmental incident occurred that required immediate action to protect human health and the environment (includes only Emergency Management Sites that require significant staff involvement).

Government Publication Date: Feb 6, 2025

Permitted Solid Waste Facilities: SWF/LF

A list of permitted solid waste and landfill facilities made available by the Minnesota Pollution Control Agency (MPCA).

Government Publication Date: Mar 20, 2025

Closed Landfills Priority List: LCP

The Minnesota Legislature enacted the Landfill Cleanup Act (LCA) in 1994 to ensure the proper closure and post-closure care at up to 112 closed, permitted municipal sanitary landfills located throughout the state. Based on this legislation, the Minnesota Pollution Control Agency (MPCA) created the Closed Landfill Program (CLP) to administer the LCA mandates. This data made available by The Minnesota Pollution Control Agency (MPCA).

Government Publication Date: Jan 16, 2025

Unpermitted Dump Sites: UNPERMITTED LF

The Minnesota Pollution Control Agency (MPCA) defines "dumps" as those landfills that never held a valid permit from the MPCA. Generally, dumps existed prior to the permitting program established with the creation of the MPCA in 1967. This database is made available by MPCA.

Government Publication Date: Feb 6, 2025

Recycling Markets Directory: RECYCLING

The Recycling Markets Directory is provided by the Minnesota Pollution Control Agency (MPCA). The markets in this database accept large (commercial) quantities of materials.

Government Publication Date: Nov 10, 2022

Historical Leaking Underground Storage Tanks: HIST LUST

A list of leaking underground storage tanks (LUSTs) in the tanks database maintained by the Minnesota Pollution Control Agency (MPCA) up until Nov 01, 2016.

Government Publication Date: Nov 1, 2016

Deleted Leaking Underground Storage Tanks: DEL LUST

A list of leaking underground storage tanks that are often deleted for various reasons. Deletion occurs primarily due to a duplication, or that the source was determined to not be from a tank. This list was provided by Minnesota Pollution Control Agency.

Government Publication Date: Jan 5, 2016

Historical Leaking Aboveground Storage Tanks: HIST LAST

A list of leaking aboveground storage tanks (LASTs) in the tanks database maintained by the Minnesota Pollution Control Agency (MPCA) up until Nov 01, 2016.

Government Publication Date: Nov 1, 2016

Historical Leak Sites: HIST LEAKSITES

A list of leak sites that were neither determined as aboveground nor underground in the tanks database maintained by the Minnesota Pollution Control Agency (MPCA) up until Nov 01, 2016.

Government Publication Date: Nov 1, 2016

MPCA Remediation Leak Sites: LST REM SITE

This is list of leak sites in which the Minnesota Pollution Control Agency (MPCA) is involved in remediation activities. The MPCA publishes this listing.

Government Publication Date: Feb 6, 2025

MPCA Tank Incidents: LST INCIDENT

A list of leaking and registered tank sites in Minnesota that includes locations, details of tank installation and construction, and installed safety measures. This list is provided by Minnesota Pollution Control Agency (MPCA).

Government Publication Date: Jan 31, 2025

Delisted Leaking Storage Tanks: DELISTED LST

This database contains a list of closed leaking storage tank sites that were removed from the Minnesota Pollution Control Agency (MPCA).

Government Publication Date: Feb 7, 2025

Underground Storage Tanks: UST

In Minnesota, there are about 18,000 regulated underground storage tanks (USTs) currently in use. The Underground Storage Tank Program in the Minnesota Pollution Control Agency (MPCA) was created to help prevent contamination caused by leaking tanks. This is a list that contains all regulated USTs. Some types of USTs are exempt from state regulations, such as: tanks with capacity of 110 gallons or less; farm and residential tanks with a 1,100-gallon capacity or less, storing motor fuel for non-commercial purposes, or heating oil for on-site consumption; tanks that contain a minimum concentration of regulated substances; flow-through process tanks; oil-water separators. This data is made available by MPCA.

Government Publication Date: Feb 7, 2025

Minnesota Above Ground Storage Tanks: AST

There are more than 20,000 regulated above-ground storage tanks (ASTs) currently in use across Minnesota. Most tanks located above ground containing liquid substances (i.e., not gaseous or solid at ambient temperature and pressure) are subject to the Minnesota Pollution Control Agency's (MPCA) rules for design and operation of ASTs. This list contains ASTs regulated by MPCA. Some types of ASTs are exempt from the regulations, such as but not limited to the following: ASTs with a capacity of 500 gallons or less; Farm ASTs; Residential ASTs storing 1,100 gallons or less of motor fuel used for noncommercial purposes; ASTs containing hazardous wastes subject to a treatment or storage permit or containing agricultural chemicals regulated under MN Statutes 18B, 18C, 18D; Stormwater collection systems and septic systems. This data is made available by the MPCA.

Government Publication Date: Feb 7, 2025

Tank Sites: HIST TANK

A list of tank sites not included in AST or UST, this list maintained by the Minnesota Pollution Control Agency (MPCA) up until Dec 30, 2016.

Government Publication Date: Dec 30, 2016

Delisted Storage Tanks: DELISTED TANK

This database contains a list of storage tank sites that were removed from the Minnesota Pollution Control Agency (MPCA).

Government Publication Date: Feb 7, 2025

Sites with Institutional Control Events: INST

A list made available by the Minnesota Pollution Control Agency (MPCA) consisting of remediation sites that have various institutional controls in place.

Government Publication Date: Nov 27, 2024

Agricultural Contingency Sites Boundaries: AG CONTINGENCY

The Minnesota Department of Agriculture (MDA) Incident Response Unit (IRU) is the state lead agency for the investigation and remediation of incidents involving agricultural chemicals (pesticides and fertilizer). This MDA IRU database includes sites with a soil or ground water contingency, deed restriction, local ordinance, restrictive covenant or deed affidavit in place. The accuracy of the boundaries of these sites can be variable - in most cases, the site boundaries should be considered as only representing the vicinity of the soil or ground water contingency area or plume.

Government Publication Date: Feb 5, 2025

Petroleum Brownfields Program Sites: BROWNFIELDS

The Minnesota Pollution Control Agency (MPCA)'s Petroleum Brownfields Program handles petroleum contamination under the Petroleum Tank Release Cleanup Act (Minnesota Statutes § 115C). This data is made available by MPCA.

Government Publication Date: Feb 6, 2025

Voluntary Investigation and Cleanup Program List: VIC

The Minnesota Pollution Control Agency's (MPCA) Brownfield Program consists of an integrated program called the Voluntary Investigation and Cleanup (VIC) Program. This program handles hazardous substance contamination under Minnesota's Environmental Response and Liability Act (Minnesota Statutes § 115B). This database is made available by MPCA.

Government Publication Date: Feb 6, 2025

Potential Voluntary Investigation and Cleanup Program Sites: POTENTIAL VIC

This listing of Potential Voluntary Investigation and Cleanup Program sites is provided by the Minnesota Pollution Control Agency (MPCA). These potential sites have not yet entered into the VIC Program until an application has been received at the MPCA.

Government Publication Date: Apr 22, 2016

MPCA Agency Interests: MPCA AI

Facility, site and project locations from the Minnesota Pollution Control Agency's enterprise database, representing locations associated with waste water, storm water, hazardous waste, feedlot, solid waste, tanks, remediation, and other agency programs. Includes records from "What's In My Neighborhood Sites".

Government Publication Date: Jan 31, 2025

Tribal

Leaking Underground Storage Tanks on Tribal/Indian Lands: INDIAN LUST

This list of leaking underground storage tanks (LUSTs) on Tribal/Indian Lands in Region 5, which includes Minnesota, is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Nov 18, 2024

Underground Storage Tanks on Tribal/Indian Lands: INDIAN UST

This list of underground storage tanks (USTs) on Tribal/Indian Lands in Region 5, which includes Minnesota, is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Nov 18, 2024

Delisted Tribal Leaking Storage Tanks: DELISTED INDIAN LST

Leaking Underground Storage Tank (LUST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian LUST lists made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Nov 18, 2024

Delisted Tribal Underground Storage Tanks: DELISTED INDIAN UST

Underground Storage Tank (UST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian UST lists made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Nov 18, 2024

County

No County standard environmental record sources available for this State.

Additional Environmental Record Sources

Federal

PFAS Greenhouse Gas Emissions Data: PFAS GHG

The U.S. Environmental Protection Agency's Greenhouse Gas Reporting Program (GHGRP) collects Greenhouse Gas (GHG) data from large emitting facilities (25,000 metric tons of carbon dioxide equivalent (CO2e) per year), and suppliers of fossil fuels and industrial gases that results in GHG emissions when used. Includes GHG emissions data for facilities that emit or have emitted since 2010 chemicals identified in EPA's CompTox Chemicals Dashboard list of PFAS without explicit structures and list of PFAS structures by DSSTox. PFAS emissions data has been identified for facilities engaged in the following industrial processes: Aluminum Production (GHGRP Subpart F), HCFC-22 Production and HFC-23 Destruction (Subpart O), Electronics Manufacturing (Subpart I), Fluorinated Gas Production (Subpart L), Magnesium Production (Subpart T), Electrical Transmission and Distribution Equipment Use (Subpart DD), and Manufacture of Electric Transmission and Distribution Equipment (Subpart SS). Over time, other industrial processes with required GHGRP reporting may include PFAS emissions data and the list of reportable gases may change over time.

Government Publication Date: Aug 5, 2024

On-Scene Coordinator Response Sites: OSC RESPONSE

This list of On-Scene Coordinator (OSC) Response Sites is provided by the U.S. Environmental Protection Agency (EPA). OSCs are the federal officials responsible for monitoring or directing responses to all oil spills and hazardous substance releases reported to the federal government. OSCs coordinate all federal efforts with, and provide support and information to local, state, and regional response communities. An OSC is an agent of either EPA or the U.S. Coast Guard (USCG), depending on where the incident occurs. EPA's OSCs have primary responsibility for spills and releases to inland areas and waters. USCG OSCs have responsibility for coastal waters and the Great Lakes. In general, an OSC has the following key responsibilities during and after a response: Assessment, Monitoring, Response Assistance, and Evaluation.

Government Publication Date: Apr 4, 2024

Facility Registry Service/Facility Index: FINDS/FRS

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the U.S. Environmental Protection Agency (EPA).

Government Publication Date: Apr 23, 2025

Toxics Release Inventory (TRI) Program: TRIS

The U.S. Environmental Protection Agency's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of toxic chemicals from U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. There are currently 770 individually listed chemicals and 33 chemical categories covered by the TRI Program. Facilities that manufacture, process or otherwise use these chemicals in amounts above established levels must submit annual reporting forms for each chemical. Note that the TRI chemical list does not include all toxic chemicals used in the U.S. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment. This database includes TRI Reporting Data for calendar years 1987 through 2021 and Preliminary Data for 2022.

Government Publication Date: Sep 20, 2023

PFOA/PFOS Contaminated Sites: PFAS NPL

This list of Superfund Sites with Per- and Polyfluoroalkyl Substances (PFAS) detections is made available by the U.S. Environmental Protection Agency (EPA) in their PFAS Analytic Tools data, previously the list was obtained by EPA FOIA requests. EPA's Office of Land and Emergency Management and EPA Regional Offices maintain what is known about site investigations, contamination, and remedial actions under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) where PFAS is present in the environment. Limitations: Detections of PFAS at National Priorities List (NPL) sites do not mean that people are at risk from PFAS, are exposed to PFAS, or that the site is the source of the PFAS. The information in the Superfund NPL and Superfund Alternative Agreement (SAA) PFAS detection site list is years old and may not be accurate today. Site information such as site name, site ID, and location has been confirmed for accuracy; however, PFAS-related information such as media sampled, drinking water being above the health advisory, or mitigation efforts has not been verified. For Federal Facilities data, the other Federal agencies (OFA) are the lead agency for their data and provided them to EPA.

Government Publication Date: Mar 31, 2025

Federal Agency Locations with Known or Suspected PFAS Detections: PFAS FED SITES

This list of federal agency locations with known or suspected detections of Per- and Polyfluoroalkyl Substances (PFAS) is made available by the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools data. The EPA outlines that these data are gathered from several federal entities, such as the federal Superfund program, Department of Defense (DOD), National Aeronautics and Space Administration (NASA), Department of Transportation (DOT), and Department of Energy (DOE). The dates this data was extracted for the PFAS Analytic Tools range from 2022 to 2024. Sites on this list do not necessarily reflect the source/s of PFAS contamination and detections do not indicate level of risk or human exposure at the site. Agricultural notifications in this data are limited to DOD sites only. At this time, the EPA is aware that this list is not comprehensive of all Federal agencies.

Government Publication Date: Oct 24, 2024

SSEHRI PFAS Contamination Sites: PFAS SSEHRI

This PFAS Contamination Site Tracker database is compiled by the PFAS Project Lab, part of the Social Science Environmental Health Research Institute (SSEHRI) at Northeastern University. According to the SSEHRI, the database records qualitative and quantitative data from each known site of PFAS contamination, including timeline of discovery, sources, levels, health impacts, community response, and government response. The goal of this database is to compile information and support public understanding of the rapidly unfolding issue of PFAS contamination. All data presented was extracted from government websites, news articles, or publicly available documents. Locations for the Known PFAS Contamination Sites are sourced from the PFAS Sites and Community Resources Map by the PFAS-REACH team, credited to PFAS Project Lab, Silent Spring Institute, and PFAS Exchange. Disclaimer: The source conveys the data undergoes regular updates as new information becomes available, some sites may be missing and/or contain information that is incorrect or outdated, as well as their information represents all contamination sites SSEHRI is aware of, not all possible contamination sites. This data is not intended to be used for legal purposes. Access the following source link for the most current information: https://pfasproject.com/pfas-sites-and-community-resources/

Government Publication Date: Jun 27, 2024

National Response Center PFAS Spills: PFAS ERNS

This Per- and Poly-Fluoroalkyl Substances (PFAS) Spills dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The National Response Center (NRC), operated by the U.S. Coast Guard, is the designated federal point of contact for reporting all oil, chemical, and other discharges into the environment, for the United States and its territories. This dataset contains NRC spill information from 1990 to the present that is restricted to records associated with PFAS and PFAS-containing materials. Incidents are filtered to include only records with a "Material Involved" or "Incident Description" related to Aqueous Film Forming Foam (AFFF). The keywords used to filter the data included "AFFF," "Fire Fighting Foam," "Aqueous Film Forming Foam," "Fire Suppressant Foam, "PFAS," "PERFL," "PFOA," "PFOS," and "Genx." Limitations: The data from the NRC website contains initial incident data that has not been validated or investigated by a federal/state response agency. Keyword searches may misidentify some incident reports that do not contain PFAS. This dataset should also not be considered to be exhaustive of all PFAS spills/release incidents.

Government Publication Date: Mar 24, 2025

PFAS NPDES Discharge Monitoring: PFAS NPDES

This list of National Pollutant Discharge Elimination System (NPDES) permitted facilities with required monitoring for Per- and Polyfluoroalkyl (PFAS) Substances is made available via the U.S. Environmental Protection Agency (EPA)'s PFAS Analytic Tools. Any point-source wastewater discharger to waters of the United States must have a NPDES permit, which defines a set of parameters for pollutants and monitoring to ensure that the discharge does not degrade water quality or impair human health. This list includes NPDES permitted facilities associated with permits that monitor for Per- and Polyfluoroalkyl Substances (PFAS), limited to the years 2007 - present. EPA further advises the following regarding these data: currently, fewer than half of states have required PFAS monitoring for at least one of their permittees, and fewer states have established PFAS effluent limits for permittees. For states that may have required monitoring, some reporting and data transfer issues may exist on a state-by-state basis.

Government Publication Date: Dec 16, 2024

Perfluorinated Alkyl Substances (PFAS) from Toxic Release Inventory: PFAS TRI

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a per- or polyfluoroalkyl (PFAS) substance included in the U.S. Environmental Protection Agency's (EPA) consolidated PFAS Master List of PFAS Substances. Encompasses Toxics Release Inventory records included in the EPA PFAS Analytic Tools. The EPA's TRI database currently tracks information on disposal or releases of 770 individually listed toxic chemicals and 33 chemical categories from thousands of U.S. facilities and details about how facilities manage those chemicals through recycling, energy recovery, and treatment. This listing includes TRI Reporting Data for calendar years 1987 through 2021 and Preliminary Data for 2022.

Government Publication Date: Sep 20, 2023

PFAS Water Quality Portal Sampling Data: PFAS WATER

This Per- and Poly-Fluoroalkyl Substances (PFAS) Environmental Media Sampling Data is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The Water Quality Portal (WQP), as a cooperative service sponsored by the United States Geological Survey, the EPA, and the National Water Quality Monitoring Council, is part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations, and individuals submit project details and sampling results to this public repository. Limitations: EPA did not carry out the sampling or testing of a majority of the data in the WQP PFAS dataset. EPA can only speak to the accuracy and completeness of the data from projects like the National Aquatic Resource Surveys for which EPA is the data owner/organization. Data may exist within the file on Quality Assurance Project Plans (QAPPs) and the approving agency of the QAPP, if a QAPP is entered.

Government Publication Date: Jan 13, 2025

PFAS TSCA Manufacture and Import Facilities: PFAS TSCA

The U.S. Environmental Protection Agency (EPA) issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) and requires chemical manufacturers and facilities that manufacture or import chemical substances to report data to EPA. This list is specific only to TSCA Manufacture and Import Facilities with reported per- and poly-fluoroalkyl (PFAS) substances. Data file is sourced from EPA's PFAS Analytic Tools TSCA dataset which includes CDR/Inventory Update Reporting data from 1998 up to 2020. Disclaimer: This data file includes production and importation data for chemicals identified in EPA's CompTox Chemicals Dashboard list of PFAS without explicit structures and list of PFAS structures in DSSTox. Note that some regulations have specific chemical structure requirements that define PFAS differently than the lists in EPA's CompTox Chemicals Dashboard. Reporting information on manufactured or imported chemical substance amounts should not be compared between facilities, as some companies claim Chemical Data Reporting Rule data fields for PFAS information as Confidential Business Information.

Government Publication Date: Jan 5, 2023

PFAS Waste Transfers from RCRA e-Manifest : PFAS E-MANIFEST

This Per- and Poly-Fluoroalkyl Substances (PFAS) Waste Transfers dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. Every shipment of hazardous waste in the U.S. must be accompanied by a shipment manifest, which is a critical component of the cradle-to-grave tracking of wastes mandated by the Resource Conservation and Recovery Act (RCRA). According to the EPA, currently no Federal Waste Code exists for any PFAS compounds. To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: • PFAS • PFOA • PFOS • PERFL • AFFF • GENX • GEN-X (plus the Vermont state-specific waste codes). Limitations: Amount or concentration of PFAS being transferred cannot be determined from the manifest information. Keyword searches may misidentify some manifest records that do not contain PFAS. This dataset should also not be considered to be exhaustive of all PFAS waste transfers.

Government Publication Date: Mar 23, 2025

PFAS Industry Sectors: PFAS IND

This Per- and Poly-Fluoroalkyl Substances (PFAS) Industry Sectors dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The EPA developed the dataset from various sources that show which industries may be handling PFAS including: EPA's Enforcement and Compliance History Online (ECHO) records restricted to potential PFAS-handling industry sectors; ECHO records for Fire Training Sites identified where fire-fighting foam may have been used in training exercises; and 14 CFR Part 139 Airports compiled from historic and current records from the FAA Airport Data and Information Portal. Since July 2006, all certificated Part 139 Airports are required to have fire-fighting foam onsite that meet certain military specifications, which to date have been fluorinated (Aqueous Film Forming Foam). Limitations: Inclusion in this dataset does not indicate that PFAS are being manufactured, processed, used, or released by the facility. Listed facilities potentially handle PFAS based on their industrial profile, but are unconfirmed by the EPA. Keyword searches in ECHO for Fire Training sites may misidentify some facilities and should not be considered to be an exhaustive list of fire training facilities in the U.S.

Government Publication Date: Mar 24, 2025

Hazardous Materials Information Reporting System: HMIRS

The Hazardous Materials Incident Reporting System (HMIRS) database contains unintentional hazardous materials release information reported to the U.S. Department of Transportation, Pipeline and Hazardous Materials Safety Administration.

Government Publication Date: May 29, 2024

National Clandestine Drug Labs: NCDL

The U.S. Department of Justice ("the Department"), Drug Enforcement Administration (DEA), provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Nov 30, 2023

Toxic Substances Control Act: TSCA

The U.S. Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule. The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI). EPA CDR collections occur approximately every four years and reporting requirements change per collection.

Government Publication Date: May 12, 2022

Hist TSCA: HIST TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing: FTTS ADMIN

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing: FTTS INSP

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List: PRP

Early in the site cleanup process, the U.S. Environmental Protection Agency (EPA) conducts a search to find the Potentially Responsible Parties (PRPs). The EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site. This listing contains PRPs, Noticed Parties, at sites in the EPA's Superfund Enterprise Management System (SEMS).

Government Publication Date: Nov 20, 2024

State Coalition for Remediation of Drycleaners Listing: SCRD DRYCLEANER

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin. Since 2017, the SCRD no longer maintains this data, refer to applicable state source data where available.

Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS): ICIS

The Integrated Compliance Information System (ICIS) database contains integrated enforcement and compliance information across most of U.S. Environmental Protection Agency's (EPA) programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained by the EPA Headquarters and at the Regional offices. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

Government Publication Date: Apr 13, 2024

Drycleaner Facilities: FED DRYCLEANERS

A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) data as made available by the U.S. Environmental Protection Agency (EPA), sourced from the ECHO Exporter file. This EPA source file tracks facilities that possess NAICS and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: Jan 6, 2025

Delisted Drycleaner Facilities: DELISTED FED DRY

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

Government Publication Date: Jan 6, 2025

Formerly Used Defense Sites: FUDS

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DOD) is responsible for an environmental restoration. The FUDS Annual Report to Congress (ARC) is published by the U.S. Army Corps of Engineers (USACE). This data is compiled from the USACE's Geospatial FUDS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) FUDS dataset which applies to the Fiscal Year 2021 FUDS Inventory.

Government Publication Date: May 15, 2023

FUDS Munitions Response Sites: FUDS MRS

Boundaries of Munitions Response Sites (MRS), published with the Formerly Used Defense Sites (FUDS) Annual Report to Congress (ARC) by the U.S. Army Corps of Engineers (USACE). An MRS is a discrete location within a Munitions response area (MRA) that is known to require a munitions response. An MRA means any area on a defense site that is known or suspected to contain unexploded ordnance (UXO), discarded military munitions (DMM), or munitions constituents (MC). This data is compiled from the USACE's Geospatial MRS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) MRS dataset.

Government Publication Date: May 15, 2023

Former Military Nike Missile Sites: FORMER NIKE

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

Government Publication Date: Dec 2, 1984

PHMSA Pipeline Safety Flagged Incidents: PIPELINE INCIDENT

This list of flagged pipeline incidents is made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types. Accidents reported on hazardous liquid gravity lines (§195.13) and reporting-regulated-only hazardous liquid gathering lines (§195.15) and incidents reported on Type R gas gathering (§192.8(c)) are not included in the flagged incident file data.

Government Publication Date: May 6, 2024

Material Licensing Tracking System (MLTS): MLTS

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: May 11, 2021

Historic Material Licensing Tracking System (MLTS) sites: HIST MLTS

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File: MINES

The Master Index File (MIF) is provided by the United States Department of Labor, Mine Safety and Health Administration (MSHA). This file, which was originally created in the 1970's, contained many Mine-IDs that were invalid. MSHA removes invalid IDs from the MIF upon discovery. MSHA applicable data includes the following: all Coal and Metal/Non-Metal mines under MSHA's jurisdiction since 1/1/1970; mine addresses for all mines in the database except for Abandoned mines prior to 1998 from MSHA's legacy system (addresses may or may not correspond with the physical location of the mine itself); violations that have been assessed penalties as a result of MSHA inspections beginning on 1/1/2000; and violations issued as a result of MSHA inspections conducted beginning on 1/1/2000.

Government Publication Date: Feb 5, 2024

Surface Mining Control and Reclamation Act Sites: SMCRA

This inventory of land and water impacted by past mining (primarily legacy coal mining operations) is maintained by the U.S. Department of the Interior's Office of Surface Mining Reclamation and Enforcement (OSMRE), as it provides information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). This inventory contains information on the type and extent of Abandoned Mine Land (AML) Problems, as well as information on the cost associated with the reclamation of those problems. The data is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed. Disclaimer: Per the OSMRE, States and tribes who enter their data into e-AMLIS (AML Inventory System) may truncate their latitude and longitude so the precise location of usually dangerous AMLs is not revealed in an effort to protect the public from searching for these AMLs, most of which are on private property. If more precise location information is needed, please contact the applicable state/tribe of interest.

Government Publication Date: May 20, 2024

Mineral Resource Data System: MRDS

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

Government Publication Date: Mar 15, 2016

DOE Legacy Management Sites: LM SITES

The U.S. Department of Energy (DOE) Office of Legacy Management (LM) currently manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The LM manages sites with diverse regulatory drivers (statutes or programs that direct cleanup and management requirements at DOE sites) or as part of internal DOE or congressionally-recognized programs, such as but not limited to: Formerly Utilized Sites Remedial Action Program (FUSRAP), Uranium Mill Tailings Radiation Control Act (UMTRCA Title I, Tile II), Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), Resource Conservation and Recovery Act (RCRA), Decontamination and Decommissioning (D&D), Nuclear Waste Policy Act (NWPA). This site listing includes data exported from the DOE Office of LM's Geospatial Environmental Mapping System (GEMS). GEMS Data disclaimer: The DOE Office of LM makes no representation or warranty, expressed or implied, regarding the use, accuracy, availability, or completeness of the data presented herein.

Government Publication Date: Dec 12, 2023

Alternative Fueling Stations: ALT FUELS

This list of alternative fueling stations is sourced from the Alternative Fuels Data Center (AFDC). The U.S. Department of Energy's Office of Energy Efficiency & Renewable Energy launched the AFDC in 1991 as a repository for alternative fuel vehicle performance data, which provides a wealth of information and data on alternative and renewable fuels, advanced vehicles, fuel-saving strategies, and emerging transportation technologies. The data includes Biodiesel (B20 and above), Compressed Natural Gas (CNG), Electric, Ethanol (E85), Hydrogen, Liquefied Natural Gas (LNG), Propane (LPG), and Renewable Diesel (R20 and above) fuel type locations.

Government Publication Date: Aug 29, 2024

Superfunds Consent Decrees: CONSENT DECREES

This list of Superfund consent decrees is provided by the Department of Justice, Environment & Natural Resources Division (ENRD) through a Freedom of Information Act (FOIA) applicable file. This listing includes Cases filed since 2010 limited to the following: Consent Decrees for CERCLA or Superfund Sites filed and/or as proposed within the ENRD's Case Management System (CMS); and applicable ENRD's Environmental Defense Section (EDS) CERCLA Cases with "Consent" in History Note. CMS may not reflect the latest developments in a case, nor can the agency guarantee the accuracy of the data. ENRD Disclaimer: Congress excluded three discrete categories of law enforcement and national security records from the requirements of the FOIA; response is limited to those records that are subject to the requirements of the FOIA; however, this should not be taken as an indication that excluded records do, or do not, exist.

Government Publication Date: Jun 26, 2024

Air Facility System: AFS

This EPA retired Air Facility System (AFS) dataset contains emissions, compliance, and enforcement data on stationary sources of air pollution. Regulated sources cover a wide spectrum; from large industrial facilities to relatively small operations such as dry cleaners. AFS does not contain data on facilities that are solely asbestos demolition and/or renovation contractors, or landfills. ECHO Clean Air Act data from AFS are frozen and reflect data as of October 17, 2014; the EPA retired this system for Clean Air Act stationary sources and transitioned to ICIS-Air.

Government Publication Date: Oct 17, 2014

Registered Pesticide Establishments: SSTS

This national list of active EPA-registered foreign and domestic pesticide and/or device-producing establishments is based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that each producing establishment must place its EPA establishment number on the label or immediate container of each pesticide, active ingredient or device produced. An EPA establishment number on a pesticide product label identifies the EPA registered location where the product was produced. The list of establishments is made available by the U.S. Environmental Protection Agency (EPA).

Government Publication Date: Feb 29, 2024

Polychlorinated Biphenyl (PCB) Transformers: PCBT

Locations of Transformers Containing Polychlorinated Biphenyls (PCBs) registered with the United States Environmental Protection Agency. PCB transformer owners must register their transformer(s) with EPA. Although not required, PCB transformer owners who have removed and properly disposed of a registered PCB transformer may notify EPA to have their PCB transformer de-registered. Data made available by EPA.

Government Publication Date: Oct 15, 2019

Polychlorinated Biphenyl (PCB) Notifiers: PCB

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: May 23, 2024

Power Plants: POWER PLANTS

This list of power plants is provided by the U.S. Energy Information Administration (EIA). The listing includes operable electric generating plants in the United States by energy source, originating from the EIA-860, Annual Electric Generator Report; EIA-860M, Monthly Update to the Annual Electric Generator Report; and EIA-923, Power Plant Operations Report. It includes all operable plants by energy source with a combined nameplate capacity of 1 megawatt or more that are operating, are on standby, or out of service for short- or long-term.

Government Publication Date: Apr 15, 2024

State

Spills reported to the Pollution Control Agency: SPILLS

This listing of reported spills is maintained by the Minnesota Pollution Control Agency (MPCA). The Minn. Stat. §115.061, which has been in effect since 1969, describes the duty of people to notify the MPCA when spills occur.

Government Publication Date: Jan 31, 2025

Department of Agriculture Spills: AG SPILLS

The Minnesota Department of Agriculture Incident Response Unit is the regulatory authority of Agricultural Chemical (Ag-Chem) Incidents in Minnesota. This list contains pesticide and fertilizer incidents reported to the Response Unit. This data made available by The Minnesota Department of Agriculture, Incident Response Unit.

Government Publication Date: Feb 5, 2025

Historic spills reported to the Pollution Control Agency: HIST SPL

The Minn. Stat. §115.061, which has been in effect since 1969, describes the duty of people to notify the Minnesota Pollution Control Agency (MPCA) when spills occur. This is the list of spills reported to MPCA, and maintained by The Minnesota Pollution Control Agency (MPCA). This list was maintained till 1 Nov 2016.

Government Publication Date: Nov 1, 2016

Registered Dry Cleaning Facilities: DRYCLEANERS

The Minnesota Pollution Control Agency (MPCA) maintains this listing of registered dry cleaning facilities.

Government Publication Date: Sep 11, 2024

Delisted Drycleaners: DELISTED DRYCLEANERS

List of sites that once appeared on - and have since been removed from - the list of registered dry cleaning facilities made available by the Minnesota Pollution Control Agency (MPCA).

Government Publication Date: Sep 11, 2024

PFAS in Groundwater Samples: PFAS GW

A list of sites from the Minnesota Groundwater Contamination Atlas where Per- and Polyfluoroalkyl Substances (PFAS) were found in groundwater samples. This list is made available by the Minnesota Pollution Control Agency.

Government Publication Date: Nov 12, 2021

PFAS in Landfills: PFAS LANDFILL

A list of sites in the Closed Landfill Program where Per- or polyfluorinated alkyl substances (PFAS) have been detected. This list is made available by the Minnesota Pollution Control Agency (MPCA).

Government Publication Date: Jan 3, 2024

Clandestine Drug Labs: CDL

The Methamphetamine Laboratory Program at the Minnesota Department of Health (MDH) works to protect human health by providing technical advice on the remediation of clandestine methamphetamine production laboratories (meth labs) and decontamination of property exposed to meth lab activities.

Government Publication Date: Aug 23, 2021

Animal Feedlots: FEEDLOTS

The Minnesota Pollution Control Agency (MPCA) tracks locations of animal feedlot facilities. The locations of animal feedlots provide information and context to support decisions on animal health, land use, and maintaining environmental quality.

Government Publication Date: May 1, 2023

Tier 2 Report: TIER 2

A list of Tier 2 Facilities in Minnesota. This list is provided by Minnesota Department of Public Safety overseen by the Division of Homeland Security and Emergency Management.

Government Publication Date: Sep 14, 2022

Bulk Storage Permits: BULK STORAGE

The Minnesota Department of Agriculture's Licensing Information System (LIS) lists individuals or companies who hold licenses, certificates and/or permits required by state law and regulated by the Department. This database only contains those LIS licenses related to anhydrous ammonia storage facilities and bulk pesticide/ fertilizer storage facilities.

Government Publication Date: Jun 24, 2024

Tribal

No Tribal additional environmental record sources available for this State.

County

No County additional environmental record sources available for this State.

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.
